- Improve scheduling and work efficiency by monitoring cycle time
- Custom alerts and anomaly detection
- Mobile friendly - monitor equipment from anywhere, on any device
- Custom reporting for each level of user - keep track of whats important to you
- Secure authentication and authorization
- Integrates with other shop software
- Scales as your shop grows

What is Accudraft **LIVE**?

Multiple solutions in one system - Accudraft LIVE is a cloud-based system developed for executives and shop managers with IoT connected finishing systems. Accudraft LIVE provides greater visibility over the machines in your shops, and the employees who use them. Accudraft LIVE doubles as a companion app for shop employees. Employees can see their performance and job data as well as actively monitor machine performance and uptime.

Active environment monitoring

- Machine performance
- Employee performance
- Machine uptime
- Electric and thermal costing
- Rule based alerting

Scales as your company grows

- Multi-Location
- Multi-Machine
- Multi-Employee
- Assign users to specific locations or machines

Customizable - Visualize the data that's important to you.

Receive custom notifications on your mobile device based on rules that you define.

- Machine uptime
- Machine sensors out of range
- Machine alarms
- Machine work phase completion
- Lengthy reports
- User transactions
- And more...

Accudraft LIVE & Accudraft Identity - Better together!
Accudraft LIVE uses the latest standards in web security and is highly optimized for mobile and web access.
